DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 8 and 18 - 20, drawn to ranking items, classified in class 707, subclass 5.
 - II. Claims 9, drawn to data structure, classified in class 707, subclass 101.
 - III. Claims 10 - 17, drawn to accessing and execution of query term, classified in class 707, subclass 4.
 - IV. Claims 21 - 26, drawn to organizing a collection of documents, classified in class 707, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions listed as Group I, Group II, Group III and Group IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention has separate utility such as follows:

- Group I: A computing system for ranking items in a search results.
- Group II: A computer memory containing a user behavior data structure.
- Group III: A computing system for accessing and execution of query term.
- Group IV: A computer implemented method of organizing a collection of documents by employing usage information.

See MPEP § 806.05(d).

Art Unit: 2172

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III and IV, the search required for Group II is not required for Groups I, III and IV, the search required for Group III is not required for Groups I, II and IV and the search required for Group IV is not required for Groups I, II and III, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
